Improvements

- Role and field prices can now be changed in the Registration Builder even for roles and fields that have already been used.
- Prices on identity cards in the Dashboard > My Info tab are now displayed per field.
- Two new properties were added to the Sprocket Card_Info object: `Expiration_Month` and `Expiration_Year`.

Fixed

- When accessing the Campaigns tab in the profile section of a standalone page, campaign cards are now displayed three to a row.
- Fixed a bug where uploading multiple donations from the API would fail if white space was removed from the request.

Upcoming

- We will be implementing fraud prevention updates across our system with reCaptcha v2 and v3 upgrades.
- We will be updating various fundraiser-list pages to paginate their results for improved loading speeds.
