## Latest Release

November 18, 2020

Zalman Friedman posted on Nov 12, 2020

## New and Exciting!

### Livestreaming!

We have released our brand new livestream features for administrators and fundraisers! Features include:

- Administrators can [embed a livestream into a campaign homepage banner](#)
- With full control over fundraiser livestream capabilities, administrators can [allow or disallow](#) livestreaming and chat [on fundraising pages](#)
- Donors can donate and chat (if enabled) to your campaign without missing a moment of the livestream
- Administrators can view which fundraisers used livestreams within reports

The livestream feature-set is a paid upgrade. To configure livestreaming for your organization, please contact our customer success team at [clientsuccess@neonone.com](mailto:clientsuccess@neonone.com).

## Improvements

- Administrators can now delete fundraisers who are on a team without removing them from their team first.
- Added a "basic" parameter to the donation API endpoint, which excludes the donation recipient's donations in the response.

## Fixed

- Fixed some saved reports that were not working.

## Upcoming

- Administrators will be able to schedule recurring reports.

## Next Release

*Disclaimer: this list is a projection of release dates and does not represent a commitment by Rallybound to release these items on the date listed. Rallybound reserves the right to reschedule release items for any reason.*
