

# Address Object

The `Address` object contains information related to the primary user associated with the present email. User address can be changed by the user in their User Profile, or by an administrator through the Admin Panel user record.

**Availability:** The `Address` object is available anywhere a user being addressed. Consequently, it's available in any email, including email blasts and Admin Email Templates, but not in editable areas on the website.

**Attributes:** The `Address` object has the following attributes:

- `Address.Address1`
- `Address.Address2`
- `Address.City`
- `Address.State`
- `Address.Zip`
- `Address.Country`
- `Address.Phone`

## Address.Address1

Returns the first line of a user's street information. Example:

### Input

```
{{ Address.Address1 }}
```

### Output

```
123 Main St.
```

## Address.Address2

Returns the second line of a user's street information. Example:

### Input

```
{{ Address.Address2 }}
```

### Output

```
APT 101
```

## Address.City

Returns the user's city.

## Address.State

Returns the user's two-letter state code. Example:

### Input

```
{{ Address.State }}
```

### Output

```
CA
```

## Address.Zip

Returns the user's zip code.

## Address.Country

Returns the user's country.

## Address.Phone

Returns the user's phone number. Example:

### Input

```
{{ Address.Phone }}
```

### Output

```
8976453241
```
