

Admin UI Update 2020: Where'd it go?

In the first quarter of 2020, Rallybound's Admin Panel interface was sunset, and all its settings, grids, and reports interfaces were migrated into the current (single) Admin interface. This brought many changes to our admin, least of which is the location of various settings, dictionary terms, and interfaces. Below we've mapped exactly where everything went so that you can easily find exactly what you're looking for.

For each item we've listed which [entity type](#) it is available for. Entities can be the organization, a group, or a campaign. Some items are only available on the campaign entity (so you'll only see that content when accessing a campaign in the admin). Any item that is on "All" entity types can also be configured on a group level to be automatically applied to all campaigns within the group. [Click here](#) for more on **entities** and what's available where. [Click here](#) for more on **inherited settings**.

If you get stuck or need any help, we are here to assist you — just reach out to our support team.

What it is	Where it was	Where it is now	Entity type
