

Cause Object

The **Cause** object contains information related to a cause, otherwise referred to as [Event Listing](#). A cause/Event Listing is an object that can be associated with a fundraiser and/or donation. The most common use of this feature is for fundraisers to create events that are displayed on their page.

Availability: The **Cause** object is available in cause-related emails:

- Member/Team Created Cause
- Custom cause-related email

Attributes: The **Cause** object has the following attributes:

- Cause.Name
- Cause.Description
- Cause.Date
- Cause.Total_Amount
- Cause.Address ([Address object](#))

Cause.Name

Returns the cause name (for example *Bake Sale*).

Cause.Description

Returns the cause description.

Cause.Date

Returns the date associated with the cause. Use a [date filter](#) to return the value in a recognized format:

Input

```
{{ Cause.Date | date: "%B %d, %Y" }}
```

Output

January 1, 2020

Cause.Total_Amount

Returns the total amount raised associated with the cause. Use a [money filter](#) to return the value in a monetary format:

Input

```
{{ Cause.Total_Amount | money }}
```

Output

\$500

Cause.Address

Returns the address associated with the cause. Cause.Address is an [Address object](#).
