

# Discount Codes

Rallybound allows you to offer discount codes to new registrants or ticket purchasers, allowing them to register to attend an event for free, or for a discounted price. Discount codes features:

- Limit the amount of times a single code may be used
  - Discount by an absolute dollar amount (e.g., \$3.00), or by percentage (e.g., 35%)
  - Activate and deactivate codes on preset dates
  - Limit the discount code to apply to registration, specific registration fields AND/OR to ticket purchases
- Note: discount codes cannot be applied selectively to options within a single field (e.g., multi-select or multiple choice fields), rather they must be applied to the entire registration field with all its included options.*
- Enable a code for users who are registering above a certain amount of people

Please note that discount codes do not apply to **each** ticket purchased when you purchase multiple of the same tickets.

Discount Codes are found in the Admin under the Forms tab. For a how-to on creating and managing discount codes, [click here](#).

The screenshot shows the Rallybound Admin interface. The top navigation bar includes Activity, Transactions, People, Email, Forms, Website, Fundraising, Reports, and System. The 'Forms' tab is active, and the 'Discount Codes' section is highlighted in the left sidebar. A 'New Discount Code' modal is open, displaying the following fields:

Code	Available	Used	Discount Amount
<input type="checkbox"/> 25OFF	10	0	\$25.00
<input type="checkbox"/> 75OFF	5	0	\$75.00

The 'New Discount Code' modal includes the following fields and options:

- Available: 0
- Discount Amount: 0
- Discount Percent: 0
- Add Start Date?
- Add Expiration Date?
- Requires Rsvp Count: 0
- On Ticket
- On Registration
- Registration:  Registration  Registration Fields
